DETAILED ACTION

Allowable Subject Matter

Claims 1-8 are allowed.

Reason for Allowability

The following is an examiner's statement of reasons for allowance: the primary reason for the allowance is the including, in combination with other limitations recited in the claims, the limitations of a motor having removable poles with positioning structures comprising a housing having a pivot portion and a circumferential periphery provided with multiple wall plates and a pair of insertion seats, each of the two insertion seats having an outer end, and formed with an insertion groove for insertion of a circuit board, the housing provided with multiple combination posts, and at least one pole, including a magnetically conducting material part, and an insulating material part, the magnetically conducting material part enclosed by the insulating material part, and partially exposed outward from the insulating material pad, the magnetically conducting material pad having a positioning hole combined on the combination post of the housing, the magnetically conducting material Dart wound with a conducting wire, as in claim 1. Also, the insulating material part having two distal ends provided with two different thicknesses for ensuring a correct assembled relationship with two adjacent wall plates, as recited in claim 7.

The Examiner concurs with the applicant's remark about allowable subject matter in claim 7, that Suzuki fails to teach or suggest insulating material having two distal ends provided with two different thicknesses for assuring a correct assembled relationship with two adjacent wall plates as claimed. On the contrary, Figures 3A-B and Figure 4 clearly show a pole tooth 34 which is disposed in a flange 36. Pole tooth (34) is composed of nine pieces of electromagnetic steel sheets (Suzuki, column 4, lines 28-35). Thus, pole tooth (34) is a conductor and not an insulator. Although pole tooth (34) has two distal ends with varying thicknesses, Suzuki's pole tooth (34) fails to disclose the claimed insulating material part having distal ends with two different thicknesses.

Comparing to the prior-art of the record, none of the prior art references of the record, either stand alone or in combination, has taught or suggest the above-mentioned features in combination with other limitations recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
